JOINT STATUS REPORT

The parties, through counsel hereby submit this report on the status of discovery and related issues:

The parties last reported on the status of discovery during the Telephone Conference with the Court held October 7, 2021. Respondents confirmed their agreement to voluntarily produce for Petitioner's counsel's review materials related to Petitioner's *Batson* claim. As the Court knows, these include jury selection materials contained in the prosecutor's files in cases other than Mr. Roney's.

The review process is underway. Respondents have thus far made multiple cases available for Petitioner's review and are currently working to locate materials from at least three more cases. Petitioner's counsel has promptly reviewed the materials once they have been made available, identifying documents he thinks are responsive. Respondents have been reviewing those documents and redacting protected information before delivering the materials to Petitioner's counsel.

The process of locating and preparing the files for Petitioner's review and then reviewing and redacting materials identified as responsive is time-consuming. The files are in off-site storage and are often quite voluminous. However, the process to date has gone smoothly and borne fruit. From the files reviewed to date, Petitioner has identified various documents pertaining to Roger King's jury selection practices, including jury lists with Mr. King's annotations, jury selection notes of testimony, juror questionnaires, and various hand-written notes of Mr. King's from voir dire.

The parties agree to continue this process without the need for the Court's intervention. In January the parties have scheduled a number of reviews and if the process continues smoothly would anticipate completion in 45-90 days.

The parties therefore ask the Court to grant the parties 90 days to continue this *Batson*-related discovery process.

Respectfully submitted,

/s/ Michael H. Gonzales
